Understanding Your Needs

Spring 2007 Newsletter

Product Focus

GUINOT
INSTITUT • PARIS

As we age, our skin cells become sluggish and tired and basic nutritional elements are no longer enough for them to perform at optimal levels. For truly effective anti-ageing results, it is necessary to provide the cells with biological energy.

Guinot's Age Logic Cellulaire is the first skincare treatment capable of reversing the actions of the cellular ageing process. This amazing new moisturiser contains ATP, the fundamental life giving molecule that releases the energy to cell's vital functions.

Guinot Age Logic Yeux

Intelligent Cell Renewal for Eyes—Part of the Age Logic range.

Boosts cellular activity for all skin types to reduce lines and wrinkles

Wendy's Welcome

After the over indulgence of the past winter months I feel more than ready for some pampering to prepare me for the summer, I'm guessing that you do to! Well whatever you want to change or improve about yourself Pinetree Beauty Salon would like to brighten up Spring with a range of gorgeous facials and body treatments—in fact everything you need to make 2007 the year you look, live and feel your best. Whether you are looking for a new skincare routine, inch loss or holistic massage we can offer you help and advice from our expert therapists in the salon. You'll also find details on our website—www.pinetreebeautysalon.co.uk. There is plenty of choice at Pinetree to help you feel fabulous on the inside and look great on the outside too!

A new service we are shortly introducing to the salon will be a monthly Chiropractic Clinic with Lisa Fawcett. Lisa qualified as a nurse eight years ago and gained her Diploma in Chiropractic in 2001. All aspects of foot-care will be undertaken from corns and verrucae, nail cutting, and hard skin removal to diabetic foot health and other problems. Remember you can combine this with your Jessica Zenspa Pedicure making sure your tootsies are in tip top condition for those open toe summer sandals.

I look forward to seeing you in the Salon soon and remember our Newsletter special offers.

Wendy

ST. TROPEZ
Airport

The St. Tropez Airport Tan is a quick, safe and easy way to achieve a flawless, natural looking tan. Before going ahead with a St. Tropez Airport Tan we recommend that you visit the salon for a patch test at least 24 hours beforehand. This is just to ensure that you have no allergies towards the product. Once you know you can go ahead with the treatment we advise you to exfoliate the day before your appointment. This ensures all dead skin cells are removed so we are tanning fresh new skin. This will then maximise the result of the tan.

When you arrive at Pinetree Beauty Salon we will ask you to complete a St. Tropez consultation card. This will highlight certain points for your therapist to take into consideration e.g. whether the tan is for a special occasion or if you have tried a fake tan before. The tan itself is applied by one of our fully trained therapists in the form of a light, bronze mist whilst you stand in a specially designed unit. The tan needs to be left on the skin for between 4—8 hours, this will help the tan to fully develop. After this time you'll need to bath or shower to reveal your tan.

The key to keeping your tan for up to 10 days is to exfoliate prior to your appointment, and to moisturise after your tan has developed. The St. Tropez body moisturiser contains L-Tyrosine, which is a tan accelerator and doesn't contain AHA's. AHA's are found in many body moisturisers as they encourage exfoliation.

So if you don't want to endure multiple sessions on a sunbed—try a St. Tropez Airport Tan at Pinetree!

Nicola's Makeup Advice

It's hard finding a makeup that will last, looks even and flawless without having to touch it up throughout the day. I.d bare minerals is a unique makeup range which is made up of pure minerals with no additives or irritants. It's quick and easy to apply, lasts all day and great for all seasons. There are colours to suit everyone in the range and it also includes the finest quality brushes to give you professional look every time.

When I have used the I.d bare minerals makeup on clients at Pinetree they are always impressed by how natural it looks and feels on the skin. Even clients with very sensitive or irritable skins have been surprised how gentle it feels and how it covers blemishes and imperfections without clogging their skin. I.d bare minerals do not contain any preservatives, oils or fragrances that you find in many other makeup brands on the market. Pop in and let one of the

Therapists apply some pure minerals to your skin so you can see how radiant your skin can look.
